

Prescription Information

We feel strongly that the prescription of medicines is a task that must be undertaken in a responsible manner. This requires a careful review of your medical record on file in our office. For this reason, prescriptions and refills will only be issued during regular office hours, between 9:00 and 3:00 pm, Monday through Friday, except Holidays. Please allow 24 hours to obtain refills.

When calling the office to request a refill in medicine, please have the phone number of your pharmacy available. Also, please keep close attention to how much medication you have left, so you can call during regular office hours. Prescriptions and refills will not be provided by the on-call physician at night or on weekends or Holidays.

Drug Information

-

Acetaminophen(Tylenol)

-

Aspirin

-

Celecoxib (Celebrex)

-

Cephalexin (Keflex)

-

Ciprofloxacin (Cipro)
